

Product Requirements Document (PRD)

Product Name: **House Matters**

Overview

House Matters is a web app connecting landlords and tenants directly, removing agents and high fees. It makes renting more accessible, affordable, and transparent.

Objectives

For landlords: self-service property management. For tenants: affordable, verified housing search. For platform: scalable and secure marketplace.

Target Users

Primary: landlords, tenants. Secondary: property managers, service providers.

Key Features

User registration & verification, property listing & management, messaging & booking, payment & escrow, reviews & ratings, map integration.

Non-Functional Requirements

Performance (<3s load), Scalability (100k users), Availability (99.5%), Security (TLS, hashed passwords), Accessibility (WCAG 2.1 AA).

Technical Requirements

Frontend: HTML, CSS, JS. Backend: Node.js/Express, Postgres, Redis. Search: Elasticsearch. Storage: S3. Payments: Paystack/Flutterwave.

Rollout Plan

Phase 1: MVP in Lagos. Phase 2: Beta in Abuja/PH. Phase 3: Public launch nationwide.

Marketing Strategy

Social media, partnerships, SEO, referral incentives, early adopter promos.

KPIs

Active listings, time-to-rent, tenant activation, landlord NPS, verified listings %, fraud rate.
